

STATE BANK OF INDIA - PROBATIONARY OFFICER (PRELIMS)

PRACTICE TEST 4 (100 QUESTIONS | 100 MARKS | 60 MINUTES)

SECTION I: ENGLISH LANGUAGE (Q1 – Q30)

Directions (Q1–Q8): Read the passage below and answer the questions that follow.

The decentralized finance (DeFi) ecosystem has challenged traditional intermediation paradigms by utilizing automated smart contracts on public ledgers. While proponents laud the elimination of counterparty friction and lowered transaction costs, systemic structural vulnerabilities persist. Automated market makers (AMMs), which replace traditional order books with liquidity pools, are inherently exposed to impermanent loss and flash-loan exploits. Furthermore, the anonymity embedded in permissionless protocols creates fertile ground for illicit capital laundering and regulatory arbitrage. Central bank regulators are increasingly concerned that unchecked interconnectedness between decentralized pools and regulated financial institutions could propagate systemic contagion during a liquidity crisis. Consequently, establishing cross-border regulatory harmonization and cryptographic audit trails has become an urgent priority.
